Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on _____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

DETAILED ACTION

Claim Objections

1. Claims 9-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend upon another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 9-13 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. Claims 1-5 and 7-8 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims are directed to methods of vaccinating cattle comprising an effective amount of an *H. somnus* vaccine, wherein the *H. somnus* is susceptible to killing by bovine complement-containing serum.

Briggs et al (U.S. Patent Number 5,840,556) set forth that *Haemophilus somnus* is a member of the Family Pasteurellaceae, which is involved in respiratory disease syndromes in domestic cattle. Briggs et al set forth that these organisms have proven difficult to genetically

Art Unit: 1645

manipulate, and therefore the construction of live, attenuated vaccines has been hampered. (See column 1).

A vaccine "must by definition trigger an immunoprotective response in the host vaccinated; mere antigenic response is not enough." In re Wright, 999 F.2d 1557,1561, 27 USPQ2d 1510, 1513 (Fed. Cir. 1993).

In view of Applicant's lack of working examples, lack of guidance, and the difficulty of genetically manipulating these bacteria as set forth by Briggs et al, one of skill in the art would be forced into undue experimentation to practice the broadly claimed invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1 and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Potter et al.

Art Unit: 1645

The claims are directed to methods of vaccinating cattle comprising an effective amount of an *H. somnus* vaccine, wherein the *H. somnus* is susceptible to killing by bovine complement-containing serum, and wherein the *H. somnus* is killed.

Potter et al (U.S. Patent Number 5,985,289) disclose of administering 45 calves a commercial *H. somnus* bacterin and achieving protection. (See columns 25-26).

In view that Potter et al disclose of vaccinating cattle with an effective amount of an *H. somnus* vaccine, and that the vaccine is killed, the disclosure of Potter et al is deemed to anticipate the claimed invention.
